

Foam Platform Skid

Description

The Steel Hooklift Skid is a rugged and efficient solution for transporting and deploying firefighting foam, designed to accommodate up to six IBC totes. Built for reliability and ease of use, this skid is equipped with advanced features to ensure quick access, easy operation, and enhanced protection during transport.

This Steel Hooklift Skid is an essential tool for fire departments and industrial firefighting teams, offering unparalleled functionality and reliability in emergency situations. Whether it's for rapid deployment or organized storage, this skid provides a comprehensive solution for managing firefighting foam with efficiency and ease.

Features

Capacity: Holds six IBC totes of firefighting foam, plumbed into a 3" manifold for streamlined distribution.

Individual Control: Each tote is fitted with a 2" ball valve, allowing operators to independently open or close the flow of foam as needed.

Enhanced Protection: Stainless steel plates are installed in each tote slot to protect the skid's deck, providing a durable sliding surface for easy loading and unloading of totes.

Quick Access Valves: Equipped with three 3" ball valves strategically located around the skid, ensuring fast and easy access to foam supplies during emergency operations.

Foam Manifold System: The 3" pipe manifold system ensures a consistent and efficient flow of firefighting foam, enhancing operational effectiveness.

Compatibility: Designed for the SL222 Hooklift, with options for other models available upon customer request.
