

HOSE BOX/ POD

Description

Large diameter hose like 6", 8", and 12" are a logistical nightmare! Not only must you deploy these heavy hoses as needed for large industrial fires, you must also pick it up and have a way to store it. This process is made easy with our Hose Box/ pods.

These units are designed to work with your existing hook lift or roll out style chassis or can be bought with the chassis. Our standard boxes/ pods can hold up to 8,000' (19,800m) of 6" hose or up to 5,000' (16,500m) of 12" hose. Specific sizing available upon request.

Optional side to side roll tarp system or optional hinged aluminum doors provide cover from elements for the hose.

Deployment of hose is made easy by simply opening the rear doors and pulling a short section to lay on the ground and begin driving off to allow hose to lay itself on ground as needed.

Features

- Greaseable Rear ground rollers
- Single rear door hinged curbside or streetside
- Side Stakes
- Painted to match OEM chassis finish
- Optional Hose Bed divider(s) installed to split the contents into multiple loads
- Built for your model of swap loader or roll off chassis
- Side access ladder
