

## Hose Recovery Equipment – Retrieval Head

### Description

Hose retrieval just became a lot easier with our line of hose recovery equipment. From the HRV, to the skid steer mounted teller, picking up hose and storage on the hose reels is a quick and easy task. Designed and built by firefighters for firefighters.

The Hose Retrieval head unit can be used on a numerous different heavy equipment manufacturers, as long as the equipment has the proper hook-ups. Attaching and unattaching the head unit is a quick and easy process so that the machinery can be used for other applications when rolling and unrolling hose is not needed.

### Features

- Pick up 6” to 12” hose
- Reels hold 500 ft. of 12” hose
- Hydraulically driven off skid steer unit

**Note:** Contact US Fire Pump Sales Department for additional custom configurations.  
Round model of reel replaced by hexagon shaped reel.

### Safety

Save the back of your hard-working personnel! Use of this equipment provides safety to those who usually lift the large diameter hose by hand.

### Application

**Dependable** - Superior performance, quality, and reliability help ensure worry-free operation and ensure a long lasting product.

**Design** - Designed for dependability and efficiency, these units can be configured for department specifications and used alongside our other products.

**Ease of Use** - Use of the equipment is intuitive and does not require intensive training. Countless man hours can be saved and reduce fatigue on firefighters retrieving hose.

**Modular** – Designed to work with a multitude of manufactures heavy equipment.
