

Hydrant Manifold- 12 inch

Description

The high output of water is required when dealing with most industrial fires. To flow these great volumes of water, the on-site source must provide the great amounts needed. Fire hydrants are essential for this reason.

Normal fire hydrants cannot provide the water needed for industrial fires like our custom-built hydrant manifolds. Designed and built to combat industrial fires, our hydrants allow for the connection of multiple hoses, varying in size, to supply water to the arsenal of firefighting equipment found in industrial settings.

The 12" Hydrant manifold is customizable to your needs and is built to last in either painted carbon steel or 304 stainless steel. Other materials available upon request.

Features

- Carbon or Stainless-Steel construction
- Lifting eyes
- Multiple discharges: 1.5" to 12" in size
- ANSI 150 Flanges Standard, other flange options available
- Discharge Gauge(s)
- SCH 40 Standard, other options available
- Offered with and without Valves

Application

- Shipyards and Docks
- Oil refineries and chemical plants
- Airports and aviation facilities
- Hazardous material response teams
- Power generation stations
- Industrial warehouses

Options

- Deck gun Risers
- Freeze Protection Valve
- 360° rotating base
- Additional ports
- Adapters in multiple sizes (NH, Storz, Etc.)
- Drain valves
