

Remote Track Monitor

Description

Why send in manpower when you can send in the Remote Track Monitor with a flow rate of 2,500 GPM to 5,000 GPM. Easy remote operations gives you a whole new tool set for attacking big fires without risking firefighters in the process.

This unit is capable of bringing the monitor to wherever you need to strategically place it to attack an industrial fire. This unit can roll and flow water at the same time with an 8" hose connected to the monitor base, making the attack completely hands free. This unit is also ready to move any other equipment that you desire with its load capacity of 3,300 LBS, and adjustable forks.

Features

- Up to 5,000 GPM (18,930 LPM) of flow
- Can flow from 7-degree incline
- 1,500 ft Standard remote operation (3 Mile Remote available)
- 360-degree field of view camera with LED lighting System
- Operational in all Weather Conditions

Patent Pending

Application

- Oil refineries and chemical plants
- Airports and aviation facilities
- Hazardous material response teams
- Power generation stations
- Industrial warehouses
