

Hose Trailer

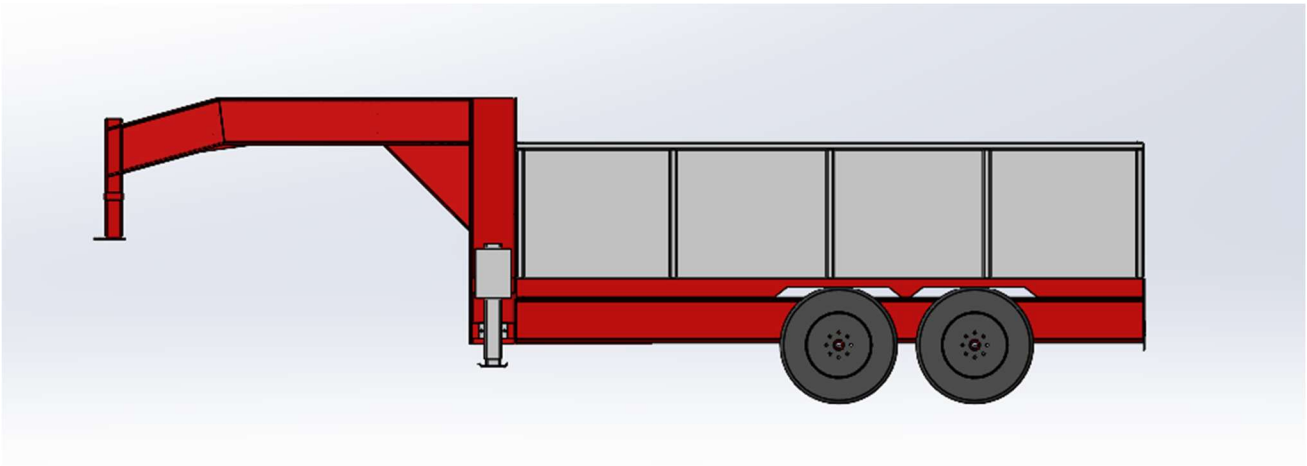

Description

Storing the hose is one of the big issues with the logistics of LDH. Our Hose Trailers are built rugged and dependable to hold these large loads of hose and be ready to go when you need them. Built to your specification for hose size and total hose capacity. These trailers have weather resistant Hypalon covers to keep water, dust, and dirt off the hose, and keep the sun from deteriorating your hose (we do not recommend storing these units outside in direct sunlight).

These trailers require little maintenance. These can also be used for deploying hose! Simply hook up to a vehicle, drop a few feet of hose and coupling on the ground and slowly drive away to let the hose pull itself out of the trailer to deploy as needed! Note: Truck towing capacity differs depending on hose load.

Features

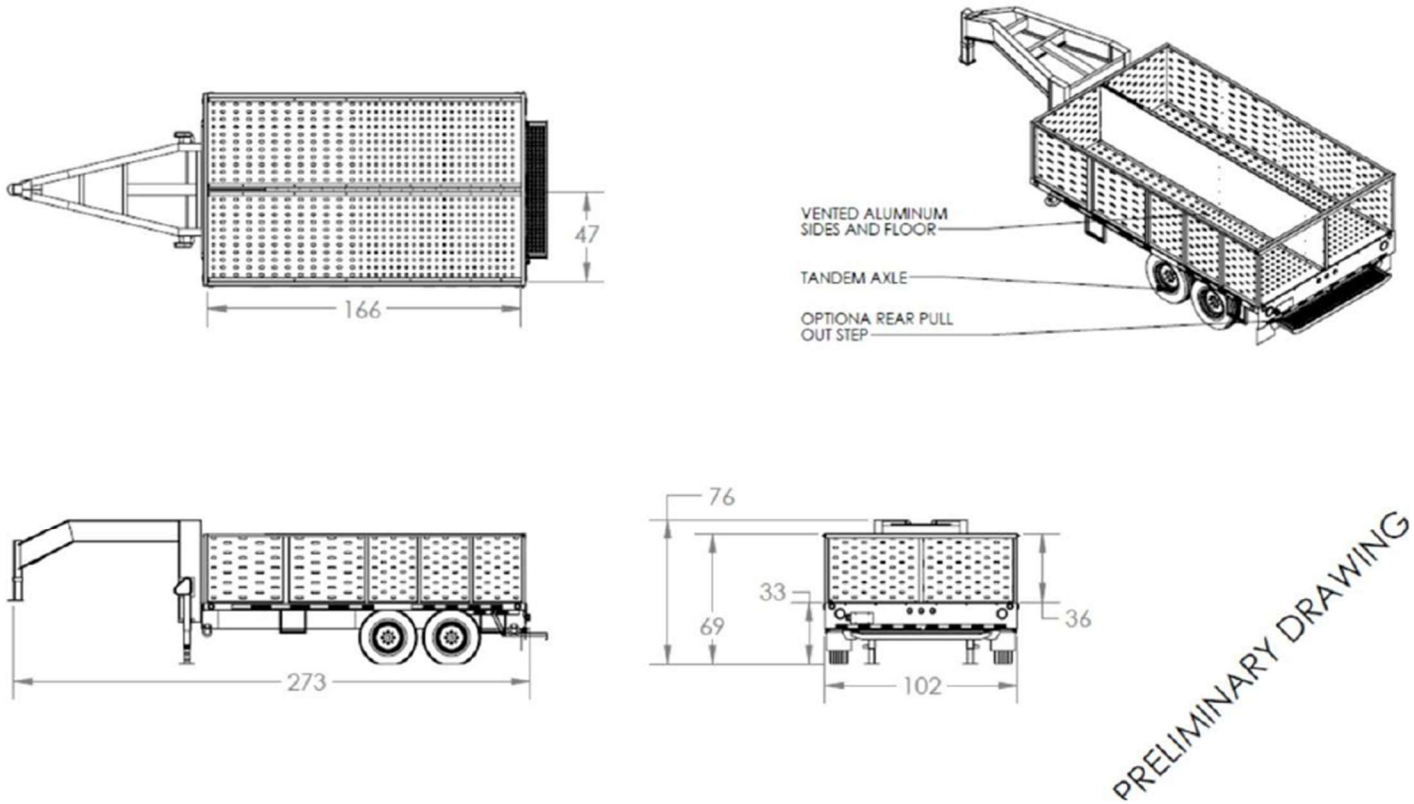

- Maximum Storage this configuration: 6000' 6" Hose (1828 m) (other sizes and capacities available)
- Approx. 3500 lbs unloaded
- Heavy Duty Steel Construction
- Tandem Axle
